

Telepsychology Instructions:

Clients do not need to download anything or create an account. No information/data is saved from the teleconference by doxy-me. 128-bit encryption is followed. This is HIPPA-compliant. No personal health information is collected by doxy-me.

Clients, please use a chrome or fire fox browser. Contact me for the scheduled session at:

<https://doxy.me/drcindystear>

The first time, you will need to enable your microphone and camera.

For each scheduled session, you will contact me at the link above, then check in your name so I know you are there. Then I will start the session at the scheduled time. It will be important for both of us to run on time, to decrease confusion.

Payment: Telepsychology is approved by CMS (Medicare) due to the national emergency declared by President Trump. (The provider modifier is GT.)

If you prefer a telephone session, I will use a land line at the office to call you. I cannot insure the confidentiality from your end for your smartphone, if you do not have a land line. Per the signed consent, you are agreeing not to use public wifi if you use your computer or tablet for your telepsychology session.
